#### **DETAILED ACTION**

This office action is in response to applicant's amendment filed October 31, 2005.

## Specification

Applicant's amendment is objected, because it referenced an incorrect application number. The number should be changed form 10/763,063 to 10/736,063. Appropriate correction is required.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 5-8 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Lin (U.S. 6,734,055).

Lin'055 (Fig. 2a-2j) discloses

(cl.1) a method of forming a gate in a semiconductor device, the method comprising: forming on a semiconductor substrate (100) a gate oxide (120) and then forming on the semiconductor substrate a sacrificial layer (130) and a sacrificial layer (130); selectively etching the sacrificial layer to form a sidewall opening (140); forming a polycrystalline silicon layer (175) on an area of the gate oxide

Application/Control Number: 10/736,063

Art Unit: 2813

layer exposed through the sidewall opening and on the sacrificial layer; performing etch back anisotropic process (Col. 5, Lines 64-65) of the polycrystalline silicon layer such that sidewall gates are formed by remaining portions of the polycrystalline silicon layer on sidewalls of the sidewall opening, a width of the sidewall gates corresponding to a desired width of a gate (col.5, Lines 36-41); and removing the sacrificial layer (2j-2k); (cl. 2,8) wherein the sacrificial layer comprises a nitride layer (CLAIM 2 of Lin); (cl. 5, 11) performing etch back anisotropic process (Col. 5, Lines 35-36) of the polycrystalline silicon;

(cl. 6, 7, 12) a width of the sidewall gates corresponding to a desired width of a gate (col.5, Lines 65-66);

(cl. 13) where gates are divided by trench (140, filled with e.g. item 195).

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3, 4, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin'055 (U.S 6,734,055) as applied to claim 1, 2, 7, and 8 and in further combination with Burns et al. (U.S. 6,258,679).

Lin further discloses that its sacrificial, nitride layer is etched, but does not appear t explicitly disclose the specific etch type that the nitride layer is

Application/Control Number: 10/736,063

Art Unit: 2813

removed using a wet etching process.

Burns teaches a wet etch (Col. 5, Lines 59-61).

It would have been obvious to one ordinary skill in the art to utilize a wet etch process on the nitride of Lin in order to bring about removal of the layer as taught by Burns (Col. 5, Lines 42-44) and as required by Lin (Fig. 2j-2g).

## Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2813

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James M. Mitchell whose telephone number is (571) 272-1931. The examiner can normally be reached on M-F 8:00-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead Jr. can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
